

Non-woven fabric

PRODUCT

Drycoat Geotex is a non-woven polyester fiber fabric with material reinforcement properties and crack resistance. The weight is 110 g / m².

USAGES

It is used for reinforcement and layer control in PMMA Drycoat systems.

PLACEMENT

Processing takes place in PMMA Drycoat systems. The non-woven fabric is inserted tightly into the resin and pressed to eliminate folds and cavities. Then the complete saturation of the wet-on-wet non-woven fabric takes place, in this regard see also the descriptions of the Drycoat systems. The strips and ribbons of non-woven fabric must overlap by at least 5 cm at the seams. The writing on the non-woven fabric indicates the overlapping area.

PACKAGES

Drycoat Geotex is supplied in rolls of 50 m in length, with the following widths:

15,00 cm
20,00 cm
26,25 cm
35,00 cm
52,50 cm
70,00 cm
105,00 cm

STORAGE

Drycoat Geotex must be stored in a dry place in a horizontal position and must be protected from moisture.
