## Drycoat Thickener

### Powder thickener

<b>PRODUCT</b>	Drycoat Thickener is a thickener in powder form.
<b>USAGES</b>	It is used to obtain thixotropic properties of PMMA-based Drycoat products, to allow the coating of vertical surfaces.
<b>PREPARATION</b>	Drycoat Thickener is added to the PMMA resin base, mixing in order to obtain a homogeneous mixture. Thixotropy occurs after a few minutes. Then the Drycoat catalyst is added according to the PMMA product information.
<b>DOSAGE</b>	Use between 2 and 4% by weight, with respect to the resin base.
<b>PACKAGES</b>	Bags of 1 or 5 kg.
<b>STORAGE</b>	Keep in a cool, dry, frost-free place. Store in sealed packages max. 12 months. Direct solar radiation from its packaging should be avoided, even on the construction site.
