

DRYPUR PB 2K LIQUID MEMBRANE FOR SURFACE WATERPROOFING AND PROTECTION

DRYPUR PB 2K

PRACTICAL, FLEXIBLE, QUICK AND ROOT-RESISTANT

DRYpur PB 2K is a liquid waterproofing system that's easy to apply and quick-drying (48 hours), allowing for faster construction site progress.

Applied in its liquid state, it easily adapts to even complex details.

Once dry, it quickly transforms into a seamless, tenacious membrane that, thanks to its low elastic modulus, has excellent crack-bridging properties.

DRYpur PB 2K is a two-component polyurethane fluid mixed with fast-drying bitumen.

It produces a highly elastic membrane with strong adhesion to many types of surfaces, including concrete, metal, and fiber cement, and excellent mechanical and chemical resistance.

It is based on pure, hydrophobic, elastomeric polyurethane resin, diluted with chemically polymerized virgin bitumen.

It can be applied with a brush, roller, or spatula.

Minimum consumption: 1.5 l/m².

ADVANTAGES

- > Excellent mechanical properties, high elasticity, tensile and tear strength, and high abrasion resistance.
- > Excellent adhesion to almost all surfaces, with or without the use of special primers.
- > Cold resistance: the film remains elastic even at temperatures as low as -40°C.
- > Excellent thermal resistance; the product never softens.
- > Certified root resistance.
- > The low elastic modulus provides excellent crack-bridging properties.
- > Good water vapor barrier properties.
- > Can also be used as a joint sealant.
- > Fast curing.
- > Thin membrane.
- > Maximum operating temperature 80°C, maximum shock temperature 200°C.
- > Good chemical resistance.

Limitations: Not recommended for non-solid substrates or UV-exposed applications.
